Elective, Cognate, or Minor Class	3					
Total	15		12			27
						120

* Placement in Math is pre-determined and you should consult your Program Evaluation or academic advisor for more information.

** All of these are required courses for the major, but do not need to be taken in any particular sequence. You should complete these courses during sophomore year, taking one of them during Fall semester of Year 2 and the other two during Spring semester of Year 2.

*** POLI 497, the Capstone course for the major, can only be taken if you have completed 90 hours of coursework. It can be taken in either the Fall or Spring semester of your senior year. If you take it in Fall, you should take your final class in your primary concentration in Spring, and vice versa.
